

OBJECTIVE

AI Developer with hands-on experience in LLM optimization, RAG design, and workflow automation. Skilled in building intelligent agents and crafting effective prompts to enhance model accuracy and reliability. Proficient in Python, data integration, and cloud-based AI deployment. Driven by passion for applying generative AI to real-world challenges.

EDUCATION

University of Seville <i>Bachelor in Software Engineering</i>	Sevilla, Spain 2019 - 2023
---	-------------------------------

Polytechnic University of Madrid <i>Master in Artificial Intelligence</i>	Madrid, Spain 2023 - 2024
---	------------------------------

EXPERIENCE

Accenture <i>RPA and AI Developer</i>	Sevilla, Spain March 2023 - July 2023
---	--

- Engineered and deployed a Generative AI-powered multifactor authentication (MFA) system, enhancing security.
- Designed and integrated end-to-end RPA workflows with front-end applications to automate complex enterprise processes and analytical reporting.

Calimaco <i>Prompt Engineer & AI Developer</i>	Madrid, Spain October 2024 – Dec 2025
--	--

- Developed and optimized LLM-based agents using Python, LangChain, OpenAI, and Google Vertex AI to automate internal workflows.
- Designed RAG pipelines integrating SQLyog databases for efficient data retrieval and contextual responses.
- Created and refined prompts to improve model performance, accuracy, and reliability across use cases.
- Built front-end features in React to enhance user interaction with AI-driven tools.
- Implemented AI system monitoring, logging, and evaluation processes to ensure performance, reliability, and security.

Deutz Global Service Center <i>AI Developer</i>	Badajoz, Spain Jan 2026 – Present
---	--------------------------------------

- Directed the AI and IT project portfolio, acting as the core technical bridge between Spain and the German HQ.
- Architected and deployed production-ready CI/CD and containerized environments from scratch.
- Built robust automated workflows and data-processing algorithms to optimize critical financial and HR operations.

SKILLS & CERTIFICATIONS

Technical Skills:

Python, LangChain, OpenAI API, Google Vertex AI, SQL, RAG Pipelines, Jira, Confluence, Agile Methodologies

Languages: Spanish (Native), English – C1 (CEFR), French – B2 (CEFR), Portuguese – B2 (CEFR)

Soft Skills:

Analytical Thinking, Problem Solving, Collaboration, Leadership, Time Management
